## About Contact Products

*We'll make it Beautiful!*

**COVID-19 response**

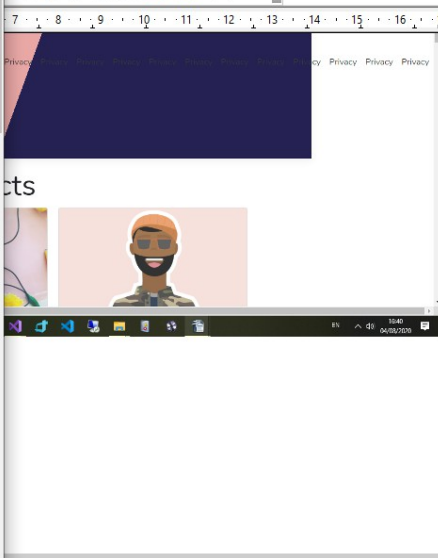

Thanks to everybody who keeps on working during pandemic.  
A lot of people re-evaluated importance of the Internet and online communication due to social isolation.  
This experience will not be forgotten.  
Order a website with substantial discount today.  
5% of your payment will be donated to medical research.  
Stay safe, stay online!

## In Chrome: Page1:

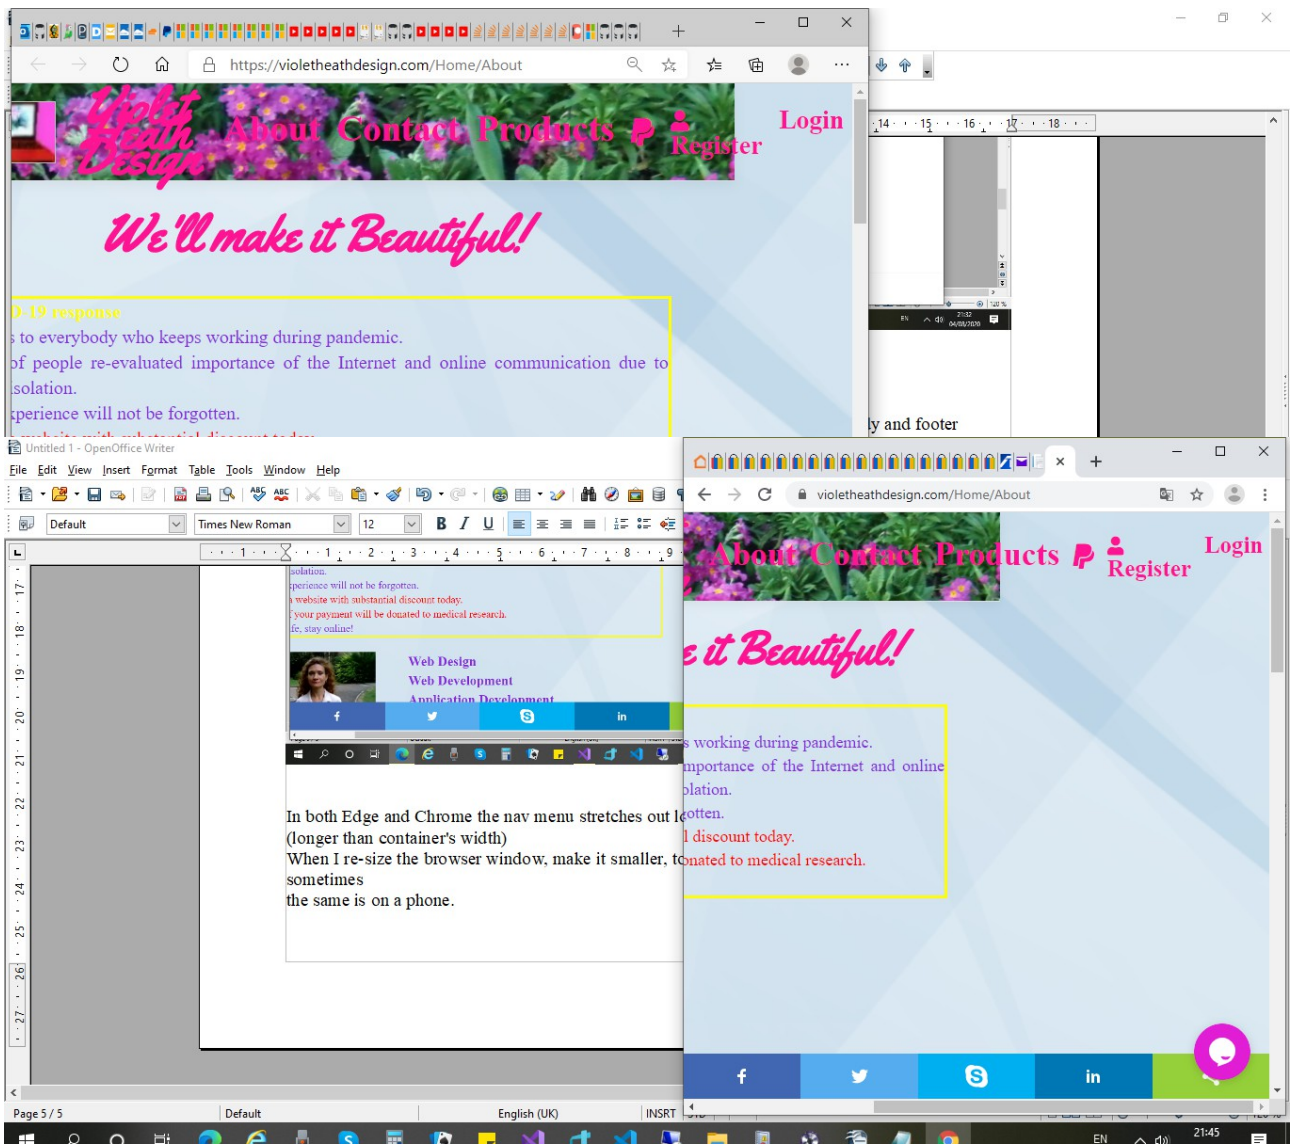

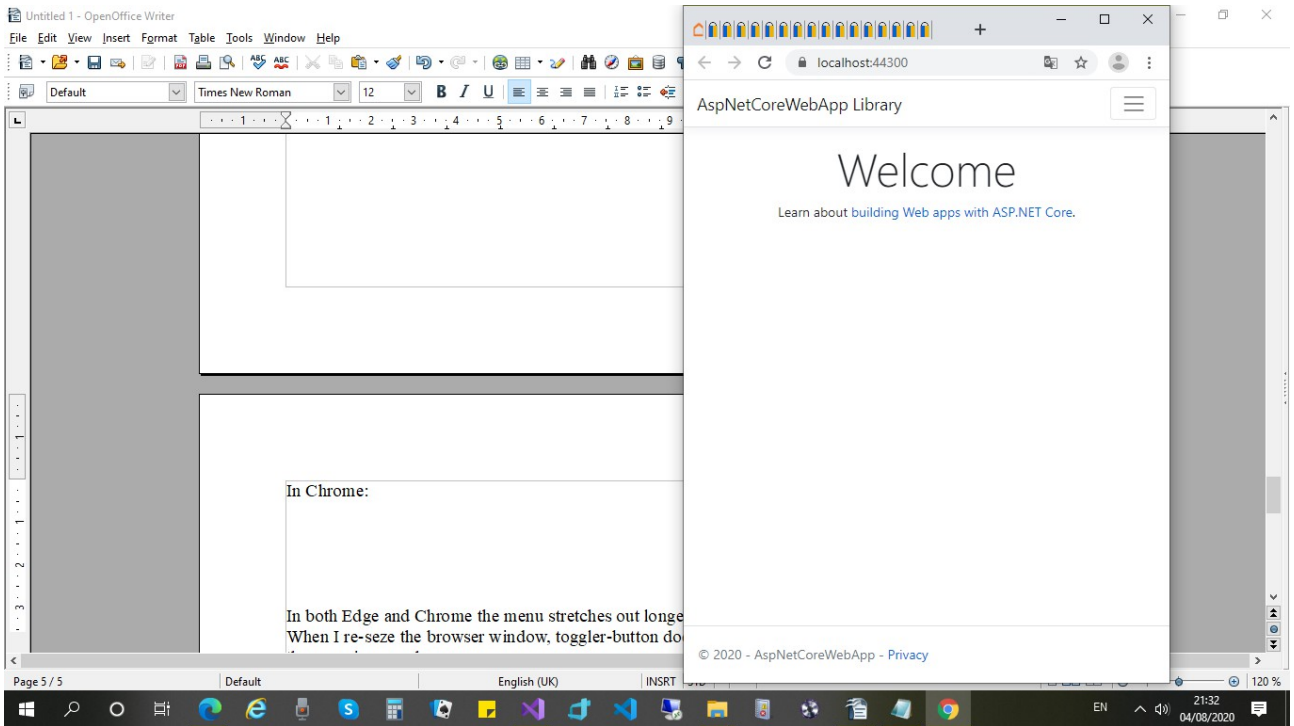

## Page1 scrolled to the right

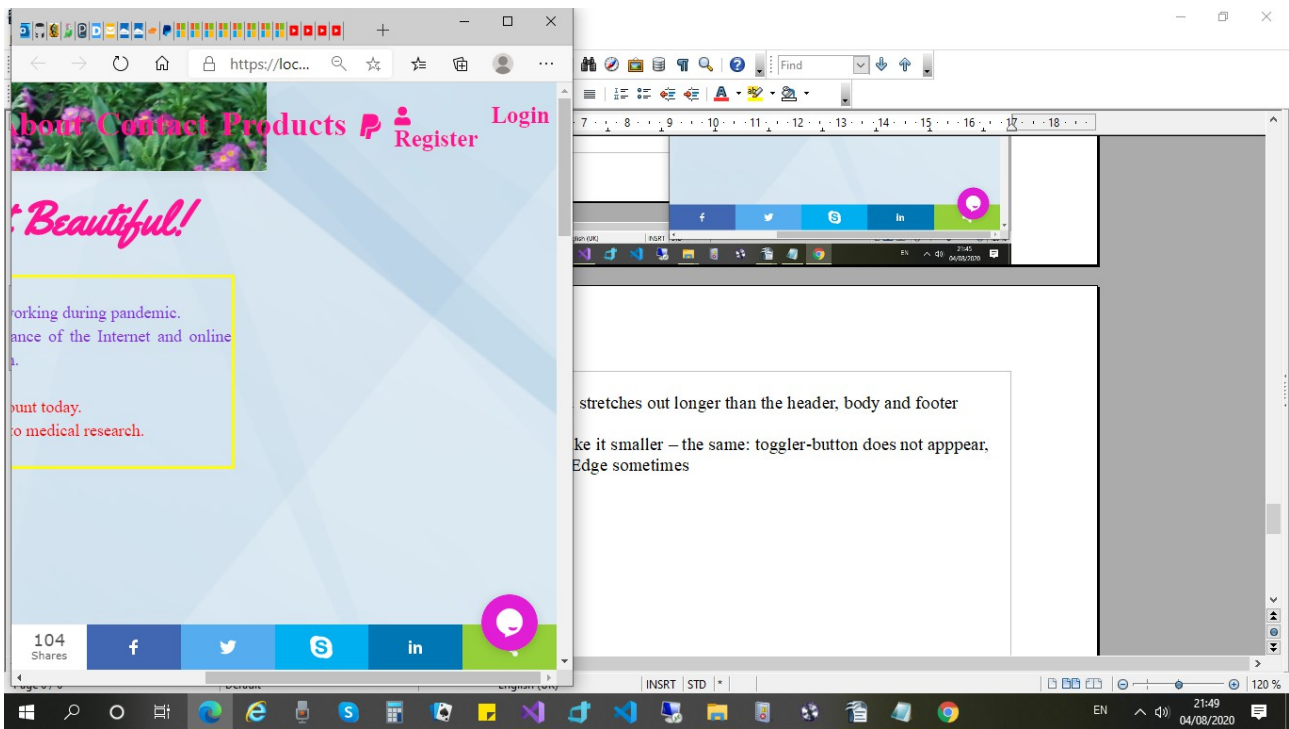

# In Edge:

In Chrome:

`class="navbar-toggleable-sm"` does not exist in Bootstrap, css.

**Toggler-button** does not always work: my long menu stretches out longer than the navigation bar, header, body and footer (longer than container's/page's width). It is true for ContosoCrafts and any Asp.Net Core web app template.

In Chrome toggler-button appears, when I re-size to minimum browser window width, in Edge – not at all. The same is on a phone.

See attached screen-shots, my <https://www.violetHeathDesign.com>

Any suggestions, please?
